

Rider Maintenance Guidelines

Keeping our riders on the road with reliable transportation is a core component of the MyCityRides program. The local MyCityRides team handles general maintenance of the scooter. We will contact lessee regarding upcoming maintenance based on actual miles driven and serve as the first point of contact for Maintenance and Warranty work.

Preventative Maintenance for the MyCityRides scooters is prescribed on the following schedule:

- 30 day Inspection – conducted within first 30 days of Lessee assuming possession of the Scooter.
- Quarterly inspections or approximately every 2,000 miles
- You will be contacted by the MyCityRides Fleet Director to schedule your appointment as needed.

Regular Maintenance includes and may be limited to:

- Oil Changes – Engine & Transmission
- Annual Tire Replacement
- Brake Pad Replacement
- Battery Replacement (once during term of contract)

Additional Repairs:

- Warranty work will be handled by appointment
- Repair of any additional damage done to the scooter should be performed by the MyCityRides team and will be at the owner's expense.
